Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907 Excerpt: .due to the fact that the external muscular work was greater, and a comparison is still possible, if due allowance be made for the fact that the extra 33 calories of external muscular work in experiment No. 57 would increase the drafts upon body material. It is nevertheless difficult to obtain from the data in these two experiments any definite conclusions regarding the relative efficiency of the fats and the carbohydrates as protectors of body material. In experiments Nos. 62 and 83, on the other hand, the external muscular work was purposely made the same in both, but unfortunately the amount of available energy was considerably less in the carbohydrate than in the fat diet, owing to a change in the diet that was necessary to make it palatable to the subject. With both diets, there was a draft upon the body material, but even with the excess of available energy in the food, the draft upon body protein and body fat was greater with the fat diet than with the carbohydrate diet. On the other hand, the draft upon body carbohydrate was much less. The difference in the amounts of available energy of the food makes the comparison somewhat difficult, but it would appear from the results of these two experiments that the fats were somewhat less efficient than the carbohydrates as protectors of body material. Regarding the gain or loss of body protein, it is important to note that fluctuations in diet produce marked...
