Therefore, a performance-based work state-ment must be carefully structured to ensure that the requirement is articulated in this manner. Accordingly, the acquisition team will conduct a series of in-depth analyses to understand the requirement fully so they can articulate the desired outcomes. For some requirements, you may simply review previous requirements for validity and accuracy. Ex-amples of this approach follow: Custodial requirement clean office administration building clean office training building clean office physics lab Pre-hardware development conceptual design component development design fabrication testing reporting requirements 2. Conduct an outcome analysis on the basis of the desired outcomes (defined in step 1) to identify performance objectives. What tasks must be accomplished to arrive at the desired outcomes An outcom. . . This item...
