Brand New Book ***** Print on Demand *****.With increasing belief by educators that education should include some type of vocational or career-related training, concerns have arisen over just how such programs can be effectively implemented to meet the needs of the teachers, students, and community groups. Separate chapters address the notion of working knowledge, the concepts of skills and work design, and ways in which the learning potential of worksites can be more fully developed through work education programs. The second part examines social relations and includes discussions of workplace relations, occupational health and safety, the interrelationships between work and leisure, and the question of unions. Finally, the authors look at work as an exchange relation and demonstrate how work education can be used to foster self-assessment, help students in job...
