General Theory of Algebraic Equations (Hardback)

By Etienne Bezout

Princeton University Press, United States, 2006. Hardback. Book Condition: New. 236 x 160 mm. Language: English . Brand New Book. This book provides the first English translation of Bezout's masterpiece, the General Theory of Algebraic Equations. It follows, by almost two hundred years, the English translation of his famous mathematics textbooks. Here, Bezout presents his approach to solving systems of polynomial equations in several variables and in great detail. He introduces the revolutionary notion of the polynomial multiplier, which greatly simplifies the problem of variable elimination by reducing it to a system of linear equations. The major result presented in this work, now known as Bezout's theorem, is stated as follows: The degree of the final equation resulting from an arbitrary number of complete equations containing the same number of unknowns and with arbitrary degrees is equal to the product of the exponents of the degrees of these equations. The book offers large numbers of results and insights about conditions for polynomials to share a common factor, or to share a common root. It also provides a state-of-the-art analysis of the theories of integration and differentiation of functions in the late eighteenth century, as well as one of...
