RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 38 pages. OCLC Number: (OCoLC)154715425 Subject: Computer security -- Government policy -- United States. Excerpt: . . . develop and maintain a complete listing of all configuration items and a baseline configuration for NFE, including application software, data files, software development tools, hardware, and documentation; ensure that all significant system changes, such as parameter changes, go through a change control process; apply comprehensive patches to system software in a timely manner. For example, a FDIC report stated that in the third quarter of fiscal year 2006, software patches for 15 out of 21 high-risk vulnerabilities and 5 out of 34 medium-risk vulnerabilities were not implemented within required time frames. In another report, between July 9, 2006, and October 9, 2006, out of nine high-risk patches that were not implemented within the required time period, eight were not implemented for 42 days. review status accounting reports, or perform complete functional and physical configuration audits; and update or control documents to reflect the current state of the environment and to ensure consistency with related documents. Specifically, documents such as the NFE security plan, risk assessment, and contingency plan did not...
