Other species were studied for comparison. The particulars of the hybrid material will be given in detail in the latter part of this paper. A description of the various phases undergone by the germ cells in their transformation from spermatogonia to mature spermatozoa is all that has been attempted in the present paper. It was intended originally to investigate also the origin of the spermatogonia and of the supporting or Sertoli cells, but it speedily became evident that such a study is a complicated problem in itself which must be postponed for the time being. On account of the comparative ease of manipulation and the abundance of material that can...
