It seemed to me that the theory of antisepsis rested upon a mass of correlated facts, experimental, clinical, and bacteriological, sufficient to establish it on a firm foundation, and that the only debatable ground remaining was that relating to the selection of methods and the improvement of details. I considered that the problem had been so scientifically stated, and its solution had been so thoroughly accomplished that, as regarded the general principles, no opposing views worthy of mention remained for discussion or refutation. I also thought that the whole history of the development and establishment of this great theory, while including the admirable labors of hundreds of medical men in all parts of the world, and constituting one of the brightest chapters in the record of human progress, yet centered around the figure of the English-speaking surgeon whose name was identified with it from its incipency, in whose mind the grand conception first took practical and definite shape, and whose patient, unassuming, conscientious work in elevating his original thought into a working hypothesis and in transforming the latter into a theory of world-wide acceptance, seemed to me to...
